

Speedframe Construction Kit

The speedy way to be individual

- Speedframe is the simple solution for purpose made benches, trolleys, display stands and a host of other items

- 25mm steel tube available in black or grey plus an alloy option

- Standard tube length 3048mm - other sizes to order

- Separate inserts mean that the connector joints can be reused

- Full range of accessories available

Speedframe is the no-fuss way to build strong frameworks. Simply cut the tube to length and tap in the joints for a smooth, snag-free structure. Add a few accessories and the framework becomes a bench, a trolley or display stand - all made to measure. Speedframe allows you to design and build your own frameworks, or if you prefer we can prefabricate the units for you and assemble them on site. Put your ideas to the test with Speedframe.

Three simple steps . . .

Step 1

Make a sketch of the item you need and cut the tube to the required lengths

Step 2

Fit the corner joints and any accessories

Step 3

Complete your design

A joint for every type of corner

2-way joint

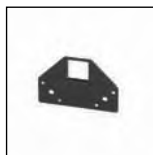

3-way joint

3-way corner joint

Accessories

Double shelf support

Single shelf support

Removable shelf support

4-way corner joint

4-way joint

5-way corner joint

Adjustable foot

Wheel foot

Cladding and glazing extrusions

6-way corner joint

Black, White or Clear Inserts

Hammer

End caps - plastic or metal

Plastic shelf spacer

Anchor plate

Plan it... Cut it... Build it... Use it... Adapt it...
